

Instruction Manual For Battery Sprayer

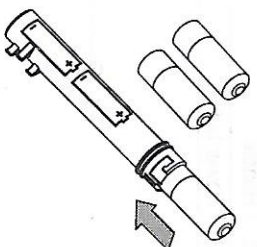

STEP 1

Unscrew the spray head from the bottle.

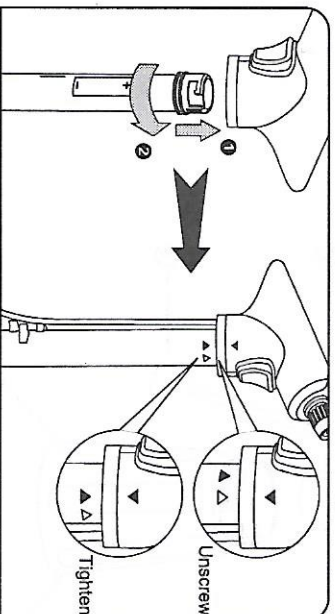

STEP 2

Rotate the battery compartment anticlockwise and pull downwards. Undip the suction line.

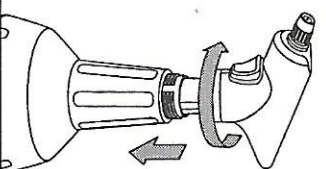

STEP 3

Insert 2 x 1.5v AA batteries into the battery compartment. Ensure they are inserted in the correct polarity - positive facing up.

STEP 4

Reinsert the battery compartment into the spray head and rotate clockwise to lock into position. Clip the suction line back on to the battery compartment.

STEP 5

Fill the spray bottle, then the spray head back into position.
